

Measurement of Uncertainty

IDFL Europe AG:

Based upon 6 sets of internal round robin tests of the same material, the measurement of uncertainty is the following:

1.8%
2.4%
2.2% (or units = 4 mm / 30g)
5.3% (or units = 0.12 NTU)
0% (or units = 0 Oxygen Index Number) NOTE: All results in each set are identical.
